

Contract Hardware

The Briton Contract Series of door hardware is a compact range of door furniture which is ideally suited for use with the Briton 5400 Contract Lock Series.

The Series features a selection of rose mounted lever furniture with matching escutcheons and a co-ordinated pull handle to satisfy the majority of door functions.

Briton Contract leversets have been successfully included in fire door tests to EN 1634 for use on 1hr timber fire doors.

Designed to suit most mortice lockcases and ideally suited for use with the Briton 5400 Series of Contract locks

Lever and rose assemblies are bolt through fixed for durability and security using 'Securex' head bolts. All rose and escutcheon fixings are concealed by push on covers

Spindle is secured to the lever by means of an external socket head screw

Slimline spring rose ensures a positive lever action and a contemporary appearance

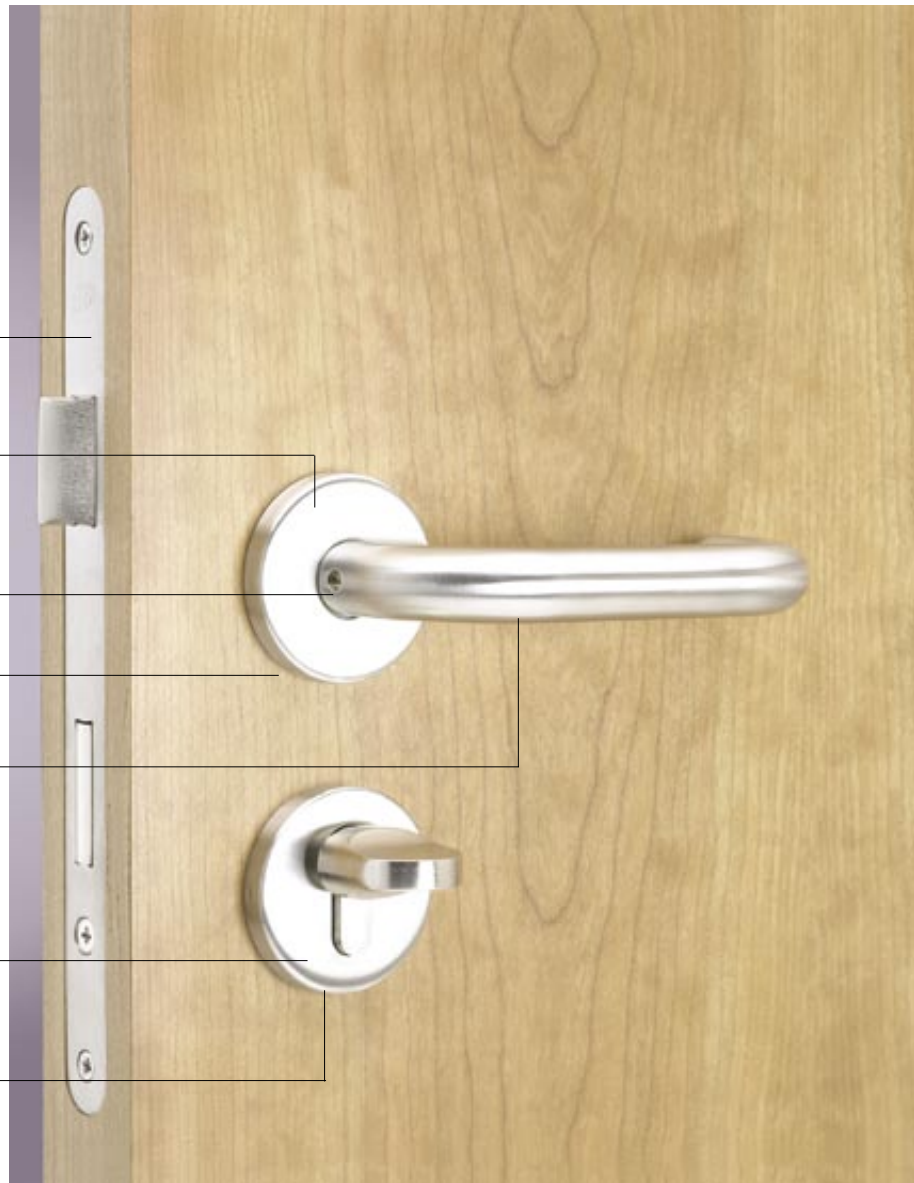

5 design options provide a choice of the most popular lever handle styles.

Levers are prefixed to the rose to ease installation and provide robust fixing. Each lever is supplied with corrosion resistant 8mm square spindle for long lasting operation

Matching escutcheons with concealed fixings satisfy most lock functions including euro profile cylinder, oval profile, lever key and bathroom functions

Satin stainless steel finish is compatible with a wide range of other door hardware items allowing complete door hardware packages to be visually integrated.

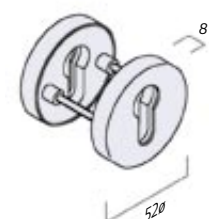

Having achieved a 240hr neutral salt spray test to BS 1670, the Contract Series has a high resistance to corrosion
